

Eight out of the eleven gold medals at the IPF Men's Worlds went home beyond what used to be the Iron Curtain. Wouldn't you like to know how guys like Alexey Sivokon train?

Following is a bench press program designed by the Russian powerlifting mastermind Boris Sheyko. The man used to train the Kazakhstan team and today is the Chief Coach Men's Powerlifting Team Russia. Comrade Sheyko's credentials include Sivokon, Mor, and Podhinniy. "Nuff said."

Heavily influenced by R. Plukfelder and I. Abajiev, Sheyko believes in some serious volume. While Western lifters

have gradually cut back to one weekly BP workload, the Russian team coach insists on four to eight bench press sessions a week! The arms and shoulder girdle can recover a lot quicker than the legs and back, he says, so why not? Sheyko likes to quote the popular among Russian weightlifters in the fifties and sixties expression: "To press a lot, one must press a lot."

No, it is not a program just for bench specialists like Irina Lugovaya who owes it her European championship title. The following supersystem is every bit as effective for full meet lifters. So enjoy the pain, Comrade!

The matrix is designed for five BP workouts a week and is aimed at an advanced powerlifter, a KMS or an MS in Russian classification.

The cycle is divided into preparatory and competition periods. Here is how the prep period gets kicked off:

Preparatory Week 1 - Monday: 1. BP - 50%x5, 60%x4, 70%x3x2, 80%x3x2, 80%x3x2, 75%x4x2 (26). Tuesday: 1. Incline BP - x4x6 (24). 2. Parallel bar dips (with weight) - x6x5, Wednesday: 1. BP - 50%x6, 60%x5, 70%x4x2, 75%x3x2, 80%x3x2, 75%x4x2 (25). Saturday: 2. PBN - 5x5 (25). 3. Parallel bar dips - x4x6.

Total lifts per week: 201. Average intensity: 67.1%.

Alexei Vorobieff of Russia was able to win the 2000 IPF World Bench Press Championship 181 pound class title against USA's McCormick (left) and Cieri. (photograph by Hiro Isagawa)

soon to be famous scientist Leonid Matveyev worked with coach Suren Bogdasarov designing Yuri Vlasov's training programs.

Although Russian Olympic lifters said good-bye to the pyramid even before the clean and press bit the dust in 1972, it lives on in Sheyko's powerlifting program, although only once a week and only in the prep period. The author appropriately calls it 'marathon'. Because it 'stuffs up the arms' so much, the Wednesday marathon is followed up by an unloading Friday session: there is only one bench series and its reps are cut short.

Preparatory Week 2 - Monday:

1. BP - 50%x5, 60%x4, 70%x3x2, 80%x3x2, 90%x1x3 (22). 3. BP - 50%x3, 60%x3, 70%x3, 80%x2x5 (19). Tuesday: 2. Parallel bar dips - x5x5. Wednesday: 2. BP - 55%x5, 65%x4, 75%x3x2, 80%x1x3, 75%x2x2 (23). Friday: 2. 50%x5, 60%x4, 70%x3x2, 80%x3x2 (36). Saturday: 2. BPN - 55%x5, 65%x3, 75%x2x5 (16). Total lifts per week: 125. Average intensity: 67.2%.

Preparatory Week 3 - Monday:

1. BP - 50%x3, 60%x3, 70%x3x2, 80%x2x2, 85%x2x3, 80%x2x2 (26). Saturday: 1. BP - 55%x3, 65%x3x2, 75%x2x4 (14). Total lifts per week: 75%x2x3, 80%x2x3 (24). Friday: 2. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (27). Saturday: 1. BP - 55%x3, 65%x3, 75%x2x5 (16). Total lifts per week: 81. Average intensity: 71.5%.

Preparatory Week 4 - Monday:

2. BP - 50%x4, 60%x4, 70%x3x2, 80%x2x5 (24). Tuesday: 2. Incline BP - x3x5 (15). 3. Parallel bar dips - x6x5. Wednesday: 2. BP - 50%x5, 60%x4, 70%x3x2, 80%x1x3, 75%x2x2 (24). Friday: 2. 50%x4, 65%x4, 75%x2x4 (23). Saturday: 2. BPN - 55%x4, 65%x3, 75%x3x2, 80%x3x2 (36). Total lifts per week: 125. Average intensity: 71.5%.

Competition Week 1 - Monday:

2. BP - 50%x3, 60%x3, 70%x3x2, 80%x2x2, 85%x2x3, 80%x2x2 (26). Saturday: 1. BP - 55%x3, 65%x3x2, 75%x2x4 (14). Total lifts per week: 75%x2x3, 80%x2x3 (24). Friday: 2. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (27). Saturday: 1. BP - 55%x3, 65%x3, 75%x2x5 (16). Total lifts per week: 81. Average intensity: 71.5%.

Competition Week 2 - Monday:

2. BP - 50%x3, 60%x3, 70%x3x2, 80%x2x2, 85%x2x3, 80%x2x2 (26). Saturday: 1. BP - 55%x3, 60%x3, 70%x3x2, 80%x3x2 (27). Friday: 2. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (28). Saturday: 1. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (26). Saturday: 1. BP - 55%x3, 65%x3x2, 75%x2x4 (14). Total lifts per week: 75%x2x3, 80%x2x3 (24). Friday: 2. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (27). Saturday: 1. BP - 55%x3, 65%x3, 75%x2x5 (16). Total lifts per week: 81. Average intensity: 71.5%.

Competition Week 3 - Monday:

2. BP - 50%x3, 60%x3, 70%x3x2, 80%x2x2, 85%x2x3, 80%x2x2 (26). Saturday: 1. BP - 55%x3, 65%x3x2, 75%x2x4 (14). Total lifts per week: 75%x2x3, 80%x2x3 (24). Friday: 2. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (27). Saturday: 1. BP - 55%x3, 65%x3, 75%x2x5 (16). Total lifts per week: 81. Average intensity: 71.5%.

Competition Week 4 - Monday:

2. BP - 50%x3, 60%x3, 70%x3x2, 80%x2x2, 85%x2x3, 80%x2x2 (26). Saturday: 1. BP - 55%x3, 65%x3x2, 75%x2x4 (12). Tuesday: Rest. Wednesday: 1. BP - 50%x3, 65%x3, 75%x2x2 (12). Thursday: Rest. Friday: Rest. Saturday: Competition. Total lifts per week: 24. Average intensity: 61.7%.

In week three Sheyko gives his

lifters 240 barbell lifts at a 64.7% average intensity. The increased volume in the 65-75% intensity zone has necessitated a drop in intensity. But because there is no one right way to wave the load up and down the coach muses that he might as well has written up something like NBL. 170/69.1%.

Note the brutal eighty-six rep Wednesday marathon. Sheyko wants that you will be a hurting unit and will have to have the grit to make it through. By the way, the above numbers are not the limit; Alexey Sivokon has done hundred twenty rep marathons while working up to 90% intensity! Naturally, he cut back on intensity the week after.

Preparatory Week 4 - Monday: 2. BP - 50%x4, 60%x4, 70%x3x2, 80%x2x5 (24). Tuesday: 2. Incline BP - x3x5 (15). 3. Parallel bar dips - x6x5. Wednesday: 2. BP - 55%x4, 65%x4, 75%x2x4 (23). Friday: 2. 50%x6, 50%x8 (44). Saturday: 2. BP - 55%x4, 65%x4, 75%x3x2, 80%x3x2 (36). Saturday: 2. BPN - x4x5 (20). 3. Triiceps work. - x10x5. Total lifts per week: 125. Average intensity: 67.2%.

The table at right, which should find its way into your training log, illustrates variability of the Russian bench press program.

In the four to six week long competition period the Russian National Team says good-bye to marathons and reduces the reps to the maximum of three per set. NBL with warm-up weights of 50-70% goes down and the number of 75-95% lifts goes up.

Competition Week 1 - Monday: 2. BP - 50%x3, 60%x3, 70%x3x2, 80%x2x5 (22). Saturday: 1. BP - 55%x3, 65%x3x2, 75%x2x4 (21). Total lifts per week: 79. Average intensity: 70.0%.

Approximately twenty days before a meet Sheyko plans a *prilidka*, or a trial run. Experienced Russian National Team members just work up to 90-95% of their max to get a feel for their openers.

During the third week a Russian lifter also cuts back to four bench days a week. Observe how he performs a medium volume/low intensity workout on Monday and rests on Tuesday to taper before the Wednesday trial run.

Nothing fancy-trendy about Sheyko's cycle; just the classic Matveyev's formula of progression from volume to intensity and finally the taper. You will not find any exotic assistance exercises in the Team Russia regimen either. "A golden rule is never to use more complex movements than necessary to achieve the desired result," as Bruce Lee once put it. "... To hit a worthy opponent with a complex movement is satisfying and shows one's mastery of technique; to hit the same opponent with a simple movement is a sign of greatness."

INTERNATIONAL TRAINING

Bench Press Training - Russian National Team Style as told to PLUSA by Pavel Tsatsouline, Master of Sports

Alexei Vorobieff of Russia was able to win the 2000 IPF World Bench Press Championship 181 pound class title against USA's McCormick (left) and Cieri. (photograph by Hiro Isagawa)

these numbers, as well as the average training weight and total tonnage - or, if you are not up on the metric system, poundsage - is mandatory. The Russian coach points out how helpful they are for serving the critical component of any strength training plan, variability, or rotation of heavy, medium, and light training sessions, both in a weekly and in a monthly cycle. Indeed, these calculations have been an integral part of Soviet weightlifting since 1958 when

you have a general idea of the Russian approach to strength program design, you should appreciate how this elegant and precise method relies heavily on the calculations of the volume expressed in a number of barbell lifts (NBL) in a given intensity zone or percentage of one rep max.

According to Boris Sheyko, tracking

home beyond what used to be the Iron Curtain. Wouldn't you like to know how guys like Alexey Sivokon train?

Following is a bench press program designed by the Russian powerlifting mastermind Boris Sheyko. The man used to train the Kazakhstan team and today is the Chief Coach Men's Powerlifting Team Russia. Comrade Sheyko's credentials include Sivokon, Mor, and Podhinniy. "Nuff said."

Heavily influenced by R. Plukfelder and I. Abajiev, Sheyko believes in some serious volume. While Western lifters

have gradually cut back to one weekly BP workload, the Russian team coach insists on four to eight bench press sessions a week! The arms and shoulder girdle can recover a lot quicker than the legs and back, he says, so why not? Sheyko likes to quote the popular among Russian weightlifters in the fifties and sixties expression: "To press a lot, one must press a lot".

No, it is not a program just for bench specialists like Irina Lugovaya who owes it her European championship title. The following supersystem is every bit as effective for full meet lifters. So enjoy the pain, Comrade!

The matrix is designed for five BP workouts a week and is aimed at an advanced powerlifter, a KMS or an MS in Russian classification.

The cycle is divided into preparatory and competition periods. Here is how the prep period gets kicked off:

Preparatory Week 1 - Monday: 1. BP - 50%x5, 60%x4, 70%x3x2, 80%x3x2, 85%x2x5 (30). Tuesday: 1. Incline BP - x3x5 (15). Wednesday: 1. BP - 50%x4, 65%x4, 75%x3x4 (20). Thursday: 1. BP - 50%x3, 60%x3, 70%x3x2, 80%x2x5 (27). 3. BP - 50%x4, 65%x4, 75%x4x4 (24). Saturday: Rest. Total lifts per week: 117. Average intensity: 71.6%.

Competition Week 2 - Monday: 1. BP - 55%x3, 65%x3, 75%x3x2, 85%x2x4 (20). 3. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (27). Tuesday: 1. BP - 50%x3, 60%x3, 70%x3x2, 80%x3x2 (28). Saturday: Rest. Total lifts per week: 117. Average intensity: 64.7%.

In week three Sheyko gives his

Alexey Sivokon of Kazakhstan winning the 2000 IPF World Bench Press crown. (photograph by Hiro Isagawa)

the intensity and the tonnage are tapered.

Competition Week 6: Monday: 1. BP - 50%x3, 60%x3, 70%x3x2, 75%x1x2 (12). Tuesday: Rest. Wednesday: 1. BP - 50%x3, 65%x3, 75%x2x2 (12). Thursday: Rest. Friday: Rest. Saturday: Competition. Total lifts per week: 24. Average intensity: 61.7%.

Sivokon points out how the last session before the meet is similar to a pre-competition warm-up. (Note the table below)

If you compare the two tables you shall notice that in the competitive period the Russian coach cut back on the volume while increasing the intensity compared to the preparatory period. In the last two weeks of the competition cycle both the intensity and the tonnage take a dive to enable the athlete to recover well before the meet.

Nothing fancy-trendy about Sheyko's cycle; just the classic Matveyev's formula of progression from volume to intensity and finally the taper. You will not find any exotic assistance exercises in the Team Russia regimen either. "A golden rule is never to use more complex movements than necessary to achieve the desired result," as Bruce Lee once put it. "... To hit a worthy opponent with a complex movement is satisfying and shows one's mastery of technique; to hit the same opponent with a simple movement is a sign of greatness."
